MEAN Stack Phase 1: Project

Developer: Lindelani Mabena

Organization:Deviare in partnership with RAIN

1. Brief Description

IT Security Blog is a Blog that allows information security experts to post articles about technological vulnerabilities which may affect the customers data, then the customers will have the ability to read the articles and learn more on how to prevent being affected by them. This is done to help customers manage their data better and also protect their data from being exposed to everyone around the world.
